Sub: Mangalore Municipality - Water Supply Scheme - Land acquisition and approach road to Head works.

In G.O.Ms.No.1798-P.H. dated 16-5-49, sanction was accorded for an estimate amounting to Rs.3.15 lakhs for constructing the [illegible]ction works etc. as the first stage of the Mangalore Water [illegible]pply Scheme.

2. It was since observed that for easy access to the Headworks site, conveyance of materials, etc., an approach road as shown in Plan San.No.62/1949 immediately essential to facilitate execution of the above sanctioned first stage scheme. Provision for acquiring the Patta land needed for the Headworks plot was omitted by oversight in the estimate already sanctioned. An estimate providing for the acquisition of the land immediately ~~for the Headx Xxxxx~~ required for the Headworks and the portion of approach road from the Gurpur road to the Headworks and formation of this bit of approach road amounting to Rs.23,300/- has now been prepared and is forwarded for obtaining the administrative approval of Government.

3. A revised estimate for this first stage Scheme will be prepared and submitted in due course, including these new items after the results of the tenders for the various items of work are known.

Sir,

Sub: Mangalore Municipality - Water supply scheme - Land acquisition.

Ref: C.E's No.5353 Pww/49-4 dated 3-9-49.

An estimate for Rs.2120 for acquisition of land at Headworks was forwarded in this office No.10164-1/49 WS dated 16-7-49. Another estimate for Rs.20,400 for the acquisition of land and formation of approach road from near Gurpur village on the Mangalore Karkal road to the Headworks is now enclosed for the approval of the Chief Engineer, as directed in the Memo cited above. This road is necessary for the easy conveyance of materials required for the execution of the Headworks. The rates adopted for the valuation of the land are based on the figures ascertained locally at the time of investigation during the year 1946. A lump sum about 33 1/3% is added to these rates for probable fluctuation in rates. Provision is made in the estimate for the formation of a road 15 ft in width and acquisition of land for a width of 20 ft.

A separate estimate will follow providing for acquisition of land required for the remaining portion of the pumping main and for the different service reservoirs based on present day cost ascertained after local enquiry.
